Issue 10: Winter 2020

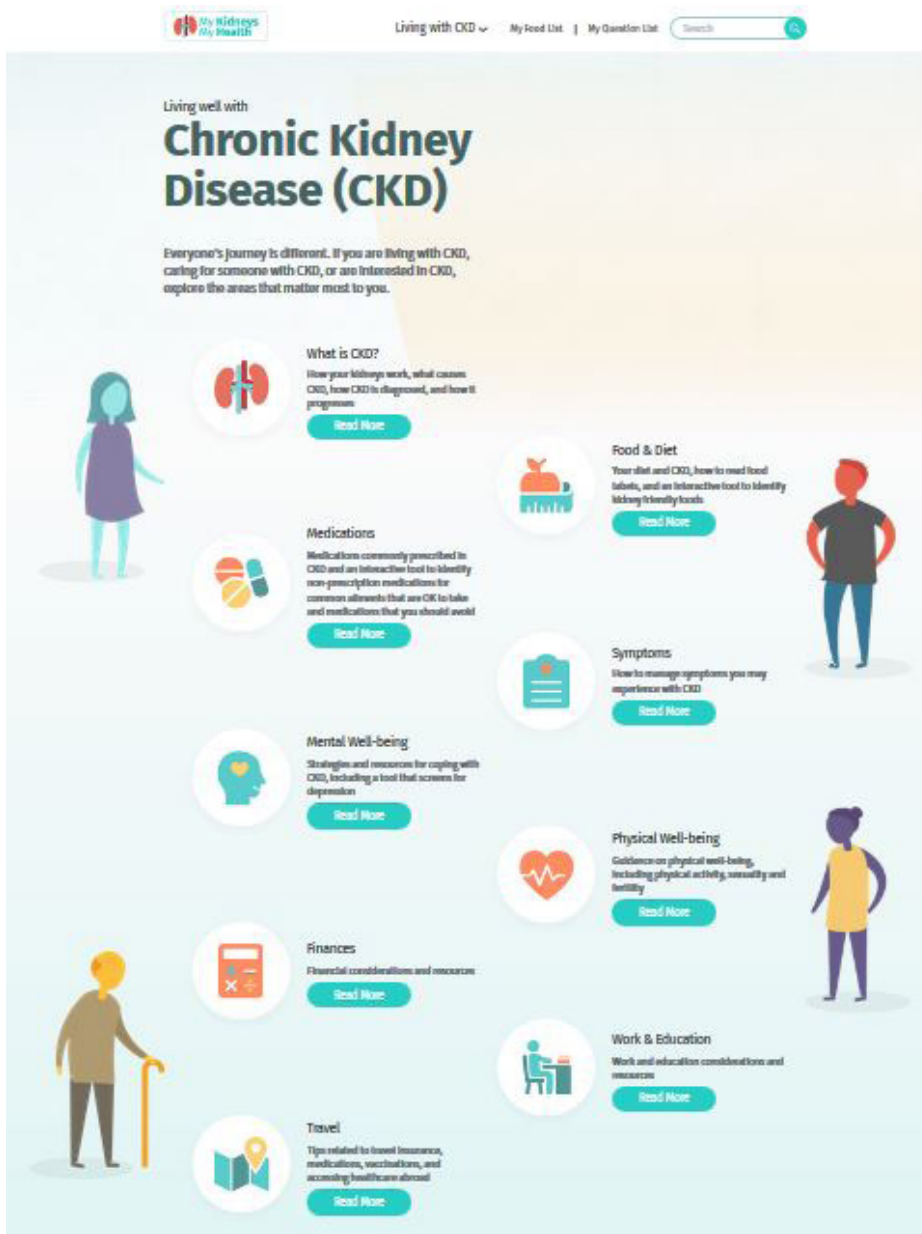

Strategy for Patient-Oriented Research

# SPOR

Putting Patients First 

## Accomplishments (Jan 2020 - March 2020)

Co-development of My Kidneys My Health website is completed! Thank you for all your suggestions and input! The website is not available to the public. It will undergo feasibility testing for user acceptability, engagement, as well as identifying appropriate implementation strategies.

## How you can contribute

- Review the co-design process and usability testing for My Kidneys My Health prototype draft manuscript that will be available in April
- We will be holding a research team update meeting later this spring, and will provide updates regarding the feasibility testing and seek input for dissemination and implementation of the website.
- Contact Mo to learn more about the feasibility testing.
