

WHERE WE'VE BEEN

AdDIT

Type 1 Diabetes Study

Type 2 Diabetes Study

Kidney Check

Indigenous kidney health

- National survey of pediatric nephrologists identified "Patient Symptoms" as priority to study

Representatives from:

- Vancouver
- Edmonton
- Calgary
- Winnipeg
- London
- Toronto
- Hamilton
- Ottawa
- Montreal

WHAT HAVE WE DONE

Manuscripts

- Two in progress
- One in print (1)

Funding awarded to:

- PRO-Kid
- KINDEST-DOC

Patient Advisory Group

- FILTR-CKD
- iCARE

EDI Approach in recruitment of patient partners

Collaborated in person to discuss direction of PRO-Kid and KINDEST-DOC

Committee engagement includes:

- Trainees and new Investigators
- Participant and Family Advisory Group for the iCARE study
- Onboarding patients to PRO-Kid and FILTR-CKD
- Seeking patient representatives on committee
- Interaction with patients, families, stakeholders, researchers and senior trainees

WHERE ARE WE GOING

Moving forwards, the committee will continue to support PRO-Kid (Patient-Reported Outcome Measure for Children with Chronic Kidney Disease) and KINDEST-DOC (Kidney and Blood Pressure Outcomes) while developing other trials within the FILTR-CKD platform.

Build a national network of Can-SOLVE CKD using administrative healthcare data to study pediatric kidney health and disease.

Reasons to set up a national framework

- Little large-scale pediatric nephrology research - need for collaboration
- Rare, heterogenous population with high morbidity
