

CANADIAN NEPHROLOGY TRIALS NETWORK (CNTN) RÉSEAU CANADIEN D'ESSAIS CLINIQUES EN NÉPHROLOGIE

VISION

To improve nephrology clinical trials in Canada in terms of

GOALS

 Meet regularly to facilitate discussion of clinical trial ideas and develop trial protocols.

 Connect investigators with interested centers across Canada.

 Support grant applications through peer review and protocol endorsement.

 Advocate for local and national high-priority studies.

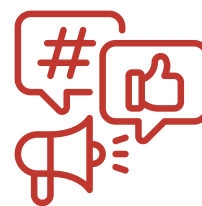

WE OFFER

Quarterly newsletter about events, publications and news in nephrology research.

Peer reviews of your grant proposal by trialists and patient partners.

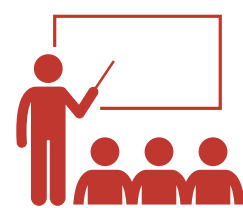

Opportunities to promote your work through the website, social media, and newsletter.

Help to find collaborators and research ready patient partners.

RECENT ACTIVITIES

Developed a training module on the peer review process for patient partners.

Developed post-review support for investigators.

CNTN and ACT

CNTN was a co-applicant on a successful CIHR grant, creating the **Accelerating Clinical Trials (ACT) Consortium**.

ACT will work to support increased clinical trial capacity and several CNTN members serve on ACT committees.
